# RANJITH PATHEPURAM

Dallas, TX | +1 (940) 843-1680 | ranjeeth.pathepuram031@gmail.com | LinkedIn | Portfolio

## PROFESSIONAL SUMMARY

- DevOps Engineer with 5+ years of experience supporting cloud-native platforms across FinTech, Healthcare, and Banking environments using AWS, Azure, Kubernetes, Terraform, Ansible, and Docker.
- Built and optimized CI/CD pipelines using Jenkins, GitHub Actions, Azure DevOps, and CodePipeline, reducing release cycle time and improving deployment reliability.
- Automated infrastructure across EKS, AKS, VPC, IAM, and RDS using Terraform and Ansible, improving environment consistency and reducing provisioning effort by 80%.
- Improved platform monitoring and infrastructure reliability using Prometheus, Grafana, ELK Stack, CloudWatch, Security Hub, Vault, and KMS, supporting SOC 2, HIPAA, and PCI-DSS environments.

## TECHNICAL SKILLS

**Cloud Platforms:** AWS (EC2, S3, RDS, EKS, VPC, IAM, CloudWatch, Security Hub, WAF, KMS, Lambda, CodePipeline), Microsoft Azure (AKS, VNet, Azure DevOps, Monitor, RBAC, Site Recovery).

**Containers and Orchestration:** Docker, Kubernetes, Helm, Docker Swarm.

**Infrastructure as Code:** Terraform, Ansible.

**CI/CD and Build Automation:** Jenkins, GitHub Actions, Azure DevOps, CodePipeline, SonarQube, Trivy.

**Monitoring and Logging:** Prometheus, Grafana, ELK Stack, CloudWatch, PagerDuty, Infrastructure Monitoring.

**Security and DevSecOps:** IAM, RBAC, CIS Benchmarks, Security Hub, WAF, KMS, HashiCorp Vault, Container Security, SAST, Image Scanning, PCI DSS, HIPAA, SOC 2.

**Scripting:** Python, Bash, PowerShell.

**Version Control and Collaboration:** Git, GitHub, Jira, Confluence.

**Operating Systems:** Linux (Ubuntu, RHEL, CentOS), Windows Server.

**DevOps Practices:** CI/CD Automation, Infrastructure Automation, Cloud Automation, Kubernetes Operations, Platform Reliability, Infrastructure Reliability, Root Cause Analysis, Multi-Cloud Environments, Agile Scrum, Release Engineering, Release Engineering Automation.

## PROFESSIONAL EXPERIENCE

**DevOps Engineer** **Feb 2024 - Present**

**Prudential Financial | Dallas, TX**

- Implemented Kubernetes deployment workflows using AWS EKS, Azure AKS, Docker, and Helm with GitHub Actions pipelines, increasing microservice release frequency from weekly to daily across FinTech environments.
- Automated infrastructure provisioning through Terraform modules for VPC, IAM, EKS, and RDS environments, reducing environment setup time by 80% and improving configuration consistency across staging and production.
- Optimized Jenkins CI/CD pipelines by integrating SonarQube quality gates and Trivy image scanning, lowering deployment-time security defects by 35% before production rollout.
- Configured Prometheus and Grafana dashboards to monitor Kubernetes node health, API latency, and container resource utilization, helping SRE teams reduce troubleshooting time by 40%.
- Strengthened DevSecOps controls by implementing AWS Security Hub alerts, IAM least-privilege policies, and KMS encryption within CI/CD workflows supporting SOC 2 compliance readiness.
- Collaborated with application development teams to containerize legacy services using Docker and Helm charts, reducing rollback-related deployment failures by 30% during platform modernization efforts.
- Resolved production reliability issues involving EKS pod memory limits and RDS connection saturation using CloudWatch metrics and root-cause analysis workflows, decreasing P1 recovery time from 4 hours to under 45 minutes.
- Integrated Azure DevOps release pipelines with AKS deployment stages supporting coordinated multi-environment rollout validation between QA, security, and platform engineering teams.

**DevOps Engineer** **Jul 2020 - Jul 2022**

**Virtusa Corporation | Hyderabad, India**

- Supported multi-cloud healthcare deployments using AWS EKS, Azure AKS, and Docker container platforms, improving clinical application availability to 99.99% across HIPAA-regulated environments.
- Engineered CI/CD automation pipelines using Jenkins, Azure DevOps, and GitHub Actions enabling container-based releases that reduced deployment cycle time from 1 hour to under 10 minutes.
- Provisioned HIPAA-compliant infrastructure using Terraform and Ansible for VNet, VPC, EKS, and RDS services eliminating configuration drift and achieving 100% Infrastructure as Code coverage.
- Implemented CIS Benchmark-based OS hardening with Ansible playbooks across Linux servers supporting compliance validation efforts and reducing security audit findings by 25%.
- Established monitoring pipelines using Prometheus, Grafana, ELK Stack, and PagerDuty alerting integrations improving incident response time by 40% across clinical workloads.
- Integrated HashiCorp Vault secrets management and Trivy container scanning within CI/CD workflows strengthening DevSecOps pipeline protections.
- Migrated container workloads from VM-based deployments to Kubernetes orchestration using Helm charts improving deployment portability and reducing environment provisioning time by 50%.

- Partnered with platform support and QA teams to validate AKS rollout strategies across test and production environments improving release coordination for healthcare microservices.

**DevOps Engineer** **Jun 2019 - Jun 2020**

**Path Technologies | Hyderabad, India**

- Deployed AWS cloud infrastructure using Terraform for EC2, RDS, VPC, IAM, and EKS environments establishing the organization's first version-controlled infrastructure baseline.
- Automated Linux configuration management using Ansible playbooks aligned with CIS Benchmarks reducing server provisioning time from 3 hours to 15 minutes across 250+ banking systems.
- Built Jenkins and GitHub Actions pipelines supporting automated Docker image creation and release workflows reducing deployment cycle time from two weeks to three days.
- Configured Prometheus and Grafana monitoring dashboards for EC2 and RDS resource utilization enabling proactive infrastructure alerting and reducing monthly downtime by 40 hours.
- Strengthened PCI DSS security posture by implementing IAM least-privilege policies, WAF protections, and S3 encryption controls supporting audit readiness across banking workloads.
- Developed Python and Bash automation scripts for AWS health checks, log rotation, and disk maintenance eliminating eight recurring manual operational tasks and saving 10+ engineering hours weekly.
- Deployed Docker container platforms supporting early-stage Kubernetes migration readiness improving application portability across development and production environments.
- Collaborated with release engineering and application teams to support AWS migration activities for 250+ legacy banking servers improving deployment consistency across infrastructure environments.

## PROJECTS

**FinTech DevOps Platform**

- Orchestrated multi-environment Kubernetes rollouts using Helm and GitHub Actions across EKS and AKS clusters, improving release traceability and reducing configuration drift by 35% across microservices.
- Standardized infrastructure provisioning by modularizing Terraform templates for IAM, VPC, and container clusters, reducing environment setup time by 60% across staging and production environments.
- Integrated CloudWatch, ELK Stack, and Grafana for API health monitoring, improving observability visibility and enabling earlier service degradation detection by 40% during peak transaction periods.

**HIPAA Multi-Cloud DevOps Platform**

- Designed secrets lifecycle automation by implementing HashiCorp Vault integrations within Azure DevOps pipelines for AKS-based healthcare workloads, reducing credential exposure risks by 30% across regulated environments.
- Hardened Linux container host baselines using Ansible-driven CIS Benchmark configurations across EKS worker nodes, improving audit readiness and reducing compliance deviations by 25%.
- Coordinated zero-downtime rollout validation using Helm-based release promotion strategies across AKS environments, improving release stability by 35% during healthcare service updates.

**Banking DevOps Foundation Platform**

- Established version-controlled infrastructure foundation by deploying Terraform-managed EC2, VPC, and RDS environments, improving provisioning consistency by 50% across AWS onboarding workflows.
- Streamlined release automation reliability by implementing Jenkins-driven Docker image validation stages integrated with GitHub repositories, reducing manual packaging errors by 40% during migration adoption.
- Configured Prometheus and Grafana monitoring for database and compute utilization, improving infrastructure visibility and reducing unplanned service interruptions by 30% across banking workloads.

## EDUCATION

**Master of Science, Computer & Information Science**

Southern Arkansas University | Magnolia, AR

## CERTIFICATIONS

- AWS Certified DevOps Engineer - Professional - **AWS**
- HashiCorp Certified: Terraform Associate - **HashiCorp**
- Microsoft Certified: Azure DevOps Engineer Expert (AZ-400) - **Microsoft**
- Google Cloud DevOps Engineer Professional Certificate - **Coursera**
- IBM DevOps and Software Engineering Professional Certificate - **Coursera**
- Site Reliability Engineering (SRE) and DevOps Engineer Professional Certificate - **Coursera**
