PROFESSIONAL SUMMARY

Aspiring Data Analyst with a strong foundation in Python, SQL, Excel, Tableau, and Power BI. Enjoys working with data to uncover patterns, solve problems, and find meaningful insights. Has developed projects focused on ride-sharing optimization and customer churn analysis, applying data cleaning, visualization, and statistical techniques to real-world problems. Eager to use analytical skills to help businesses make better, data-driven decisions while continuing to grow in the field of data analytics.

TECHNICAL SKILLS

Programming & Tools: Python, Excel, Tableau, Power BI

Data Management & Engineering: Data Extraction, Data Cleaning, Data Manipulation, Data Aggregation, Data Transformation, Data Profiling, Relational Database Optimization, PostgreSQL

Statistical & Machine Learning Techniques: Classification, Clustering Techniques, Regression Analysis, Statistical Modeling, Hypothesis Testing, Exploratory Data Analysis (EDA)

Data Visualization & Dashboarding: Tableau, Power BI, Matplotlib, Dashboard Design, Interactive Dashboards, Data Visualization, Insight Presentation, KPI Metrics, Trend Analysis

Business Analytics & Domain Techniques: Marketing Analytics, Customer Segmentation, Churn Analysis, Seasonal Analysis, Geospatial Analysis, Sentiment Analysis

PROJECTS

RIDE IT ANALYSIS

Technologies: Python, SQL, Tableau, Power BI

- Developed end-to-end data pipeline in Python and SQL to profile, clean, and transform ride□booking, cancellation, driver, and rating datasets, reducing data preparation time by 30%.
- Engineered KPI suite and trend analyses using Tableau and Power BI, enabling stakeholders to identify a 12% increase in driver retention after targeted interventions.
- Delivered interactive dashboards for senior leadership, consolidating key metrics and marketing subscription impact, supporting data□driven decision□making across product and operations teams.

CREDIT CARD CUSTOMER CHURN

Technologies: Python, SQL, Power BI, Tableau

- Built predictive churn model in Python leveraging SQL-extracted demographic and usage variables, achieving 85% accuracy in identifying at□risk cardholders.
- Segmented high□risk customers by utilization patterns, income, and age, producing actionable cohorts that reduced projected churn by 8% through targeted retention campaigns.
- Designed and deployed interactive Power BI and Tableau dashboards visualizing churn drivers and behavior trends, accelerating executive reporting cycle from weekly to daily.

AIRBNB DATA ANALYSIS

Technologies: Python, SQL, Tableau, Power BI, Matplotlib

- Developed Python and SQL pipelines to analyze Airbnb listings, identifying photo and amenity factors that lifted prices by 15%.
- Performed seasonal and location trend analysis with Tableau, pinpointing peak pricing periods and high-value neighborhoods, boosting occupancy by 10%.
- Built interactive Power BI dashboards with Matplotlib visualizations to present price trends and review sentiment, enabling data-driven pricing decisions.

EDUCATION

Master Of Computer Applications — **SEP 2024 – MAY 2026**

Dundalk Institute of Technology | Dundalk City | GPA: First Class Honours

Bachelor Of Technology — **JUN 2019 – AUG 2023**

CBIT | Hyderabad | GPA: 7.34

CERTIFICATIONS

Power BI Data Analyst Associate (PL-300) | **Microsoft**

Data Analytics Professional Certificate | **Google**
